2.4 mm Adapter In Series

The 2.4 mm connector is a type of RF (Radio Frequency) connector that is commonly used in high-frequency applications where a precise and reliable connection is required. It is similar to the 2.92 mm connector, but smaller in size.

The 2.4 mm connector has a screw-on coupling mechanism, which provides a secure and reliable connection. It also has a characteristic impedance of 50 ohms, making it suitable for high-frequency applications up to 50 GHz.
